

# API-17H Single or Dual Port Hot Stab

Ocean 5 API-17H hot stabs as well as receptacles are manufactured and tested to the highest industry requirements. The body can be made from different materials depending on operating conditions and environment. The seal material & design can be customised depending on type of fluid and operating pressure expected. Different options are also available for the fluid ports depending on user preference and pressure rating requirements. All units are supplied with material certs, test records, Certificate of Conformity, and packaged carefully to protect sealing surfaces.

## SPECIFICATIONS

### Hot Stab

### Receptacle

Weight In Air	~ 4.9Kg to 5.7Kg	Typically 5 to 6.6Kg depending on flange design
Weight in Water	~ 4.2Kg to 5Kg	~ 4.3 to 5.9 Kg
Port	3/8 NPT, Autoclave or other port types as required	
Material	SS316, Duplex SS, Nitronic, Copper Nickel Alloy, Inconel	
Operating Pressure	Up to 15,000PSI	
Operating Fluid	Petroleum or Water Based	
Seals	Customisable based on applications	
ROV Deployment	D-Bar, T-Bar or Fishtail Handle
